

I pay \$10/month for my XM-Radio for a reason.. Because terresterial based radio stations cannot provide the same coverage or signal clarity. I urge you to reject petition 04-160. Competition is good for business and especially its consumers. If local radio stations were able to provide the same level of service, XM radio would have never evolved. Please don't keep America in the stone age!

Thank you for reading,

Vincent Alberico

Happy XM Radio Listener
